Jaguar 4.2 XK-E Coupe & Roadster

“A different breed of cat”
Jaguar 4.2 XK-E Coupe & Roadster...specifications...dimensions...options

BODY CONSTRUCTION. 2-door, 2-seater stressed shell all-steel body of unique monocoque construction. Tubular steel front sub-frame carries engine and suspension, fabricated steel rear sub-frame carries independent rear suspension and final drive units. Wrap-around bumpers with overriders front and rear. Centrally-located jacking points on either side of car. Roadster. Folding top with large rear window mounted on a special frame to permit easy raising or lowering. A fibreglass hardtop (optional extra) can be fitted without removing lowered soft top. Coupe. Large window in rear luggage door, along with wraparound windshield and thin pillars, provides excellent visibility. Rear quarter windows are hinged for ventilation.

APPOINTMENTS. Door panels are finished in finest quality leathersette. Carpets covering thick felt underlay. Twin bucket seats, each adjustable for reach, upholstered in leather hide over deep foam rubber cushions. Twin padded sun visors (coupe only). Instrument Panel. Panel is matte-finished to eliminate reflections. Comprehensive instrumentation includes 150-mph speedometer and tachometer in front of driver and a central section containing separate instruments for oil pressure, water temperature, fuel gauge (with low-level warning light), ammeter, and a row of labelled toggle switches for accessories. Separate housing beneath this panel has space for radio (optional extra), twin speakers and ash tray. Panel in front of passenger has open glove compartment and grab handle. Heat and Air Vent. Fresh air heating and multipoint windshield defrosting system incorporates 2-speed fan controlled by switch on panel. Controls for temperature and air volume on panel with ducts to direct air to either side of car. Luggage Compartment, Roadster. Access to luggage compartment in rear of car is by internal release, which raises deck lid. Additional parcel accommodation behind seats. Spare wheel and tire beneath door in trunk floor. Fitted tool kit housed in center of spare wheel. Jack and wheel hammer provided. Luggage Compartment, Coupe. Covered compartment immediately behind seats for small parcels. Luggage can be carried in flat, padded area behind seats. Hinged luggage retainer at front drops down to increase luggage space if required. Access is through large rear door, opened by internal release. Spare tire and tools as in roadster.

SUSPENSION. Front, independent, with transverse wishbones and torsion bars controlled by telescopic shock absorbers. Anti-roll bar fitted to lower wishbones. Rear, fully independent, self-contained unit mounted in pressed steel cross-member attached to body by pairs of rubber blocks on each side. Lateral location of wheels by transverse links of unequal length, with universally-jointed live half shafts acting as the upper pair. Longitudinal location is provided by rubber mountings locating the sub-assembly in the body structure, and by radius arms between the lower link and a mounting point on the body structure. Pairs of coil springs, each enclosing a telescopic shock absorber, provide the suspension medium at each wheel. Wheels and Tires. 15-in. wire-spoke wheels with centerlock hubs fitted with Dunlop high performance tires and tubes.

BRAKES. Dunlop 4-wheel discs with quick-change pads. Servo assisted, self-adjusting. Front brakes are mounted at wheel hubs; rear are inboard adjacent to differential. Independent hydraulic circuits, with separate master cylinders, front and rear. Self-adjusting. "pull-up" handbrake. Combined handbrake and brake fluid level warning light on dash.

(All specifications are standard except as noted.)
