THE XJ-S JUNIOR

The Jaguar XJ-S V12, the most exciting convertible in British automotive history since the legendary E-type, is now available as a half-scale reproduction to suit persons of discerning tastes in the age range 4 years to pre-teens.

After all, it is never too soon to develop an appreciation of the finer things in life!

For the Younger Driver

The Jaguar XJ-S Junior offers a sliding driver's seat to accommodate variations in height and a passenger seat fixed at a suitable distance from the dashboard.

The Heart of a Jaguar

The model is powered by a single 24 volt traction motor using a chain drive to an axle mounted differential. A single, simple to operate pedal controls the electronic acceleration and braking system. Acceleration is carefully governed to reach up to approximately 12 mph, giving a similar impression of power and grace to the original. The reverse is half-speed

and the electronic braking offers rapid deceleration for extra security. All the power system components are tried and tested.

The steering is built to ensure a smooth and secure ride.

A Body like a Great 'Cat'

Whether Signal Red, Glacier White or Racing Green, the new owner will appreciate the brilliance of the Junior, with smartly chromed brightwork on the filler cap and exhaust pipes, as well as the classic Jaguar badging.

Once again, safety is an important consideration, the construction being in fire retardant reinforced plastic with rounded edges and fixed doors, bonnet and boot. There is a padded canvas hood cover for that authentic sporting air. The wheels have 5.00 x 14 pneumatic tyres fitted with special trims.

THE INSIDE STORY

Behind the tinted perspex windscreen with its polished surround, the wood veneer dashboard reflects the control-centre of the full scale model. For passenger comfort, a stereo radio cassette with door-mounted speakers is set into the centre console. A battery charging point is located under the filler cap.

The switches for the working headlights, tail-lights and indicators are also mounted in the dashboard. Impressions of the high intensity fog lamps and reversing lamps are fitted front and rear.

The luxury of Jaguar interiors is world-famous and we are proud to say that, despite the reduced proportions of the XJ-S Junior, as far as comfort is concerned no half-measures have been taken. The twin seats have fixed head-rests and are deeply upholstered in genuine, colour-matched Connolly's leather to co-ordinate with the leather-covered door panels and the carpeting throughout.

Skilfully crafted and thoughtfully designed for the 'early-learner' driver, the Jaguar XJ-S Junior is more than just a toy - it's a step in the right direction.

DIMENSIONS

Length: 7' 10" (2387mm)

Width: 3' 1" (940mm)

Height: 2' 1" (635mm)

Consult your local Jaguar dealer for more details - he may even be able to arrange a test drive.
