of Warwick

Avon - Stevens XJC Convertible

"There is nothing on four wheels which can really match the elegance of a high quality British OPEN car."

Backed by 60 years of designing and building fine automobiles this conversion, carried out to the instructions of individual Clients maintains the full spaciousness of the XJ Coupe interior and luggage compartment by the use of a specially designed hood which is very light, compact and easy to operate manually.

Raised, the hood shape is such that it does not distort at speed and wind noise is minimal. Visibility through the rear window is excellent, and the whole hood is lined with 'West of England' cloth. Lowered, the hood stows away neatly under a clip-on bag. The strength of the car is maintained by modifications and additions to the underframe, and the paintwork wholly refurbished during conversion.
