

XF

SPORTBRAKE

LIFE. BALANCED

XF Sportbrake is the award-winning Jaguar XF engineered to new levels of practicality. It brings together the high performance that is the heart of every Jaguar with spacious estate car capacity. XF Sportbrake's sports car performance and luxury saloon features are combined with the versatility of a true estate.

Wherever you go, XF Sportbrake is designed to carry you and your cargo safely, effortlessly and in luxurious style. It has the capacity, and it satisfies the desire. XF Sportbrake features Jaguar's progressive assistive technologies that help optimise your driving experience with dynamic performance and outstanding drive refinement. It makes life a little easier, a little better and definitely more exciting.

To build your new XF Sportbrake visit the configurator at jaguar.co.uk/build-yours.

DESIGN THAT MOVES

With a sleek extended roofline giving it an assertive silhouette, XF Sportbrake is unmistakably a sporting estate. Perfectly executed to carry more, its proportions have been shaped to achieve aerodynamic excellence. XF Sportbrake makes no compromise in its assertive styling. The front is pure XF: nose down, sleek and purposeful with slim Bi-function HID headlamps and integral LED daytime running lights. From front to rear, XF Sportbrake's widening side profile gives it a sense of length and dynamism. The window-line tapers gracefully as the flanks meet the rear privacy glass area with its continuous wrap-around curve. The rear of XF Sportbrake features a one-piece tailgate with integral spoiler and full-LED tail lights.

TAKE YOUR WORLD WITH YOU

Designed for your life, XF Sportbrake's loadspace versatility takes whatever you need, wherever you need to go. When space matters, XF Sportbrake embraces it. At almost two metres in length, and over a metre in width at its narrowest point, the loadspace features **1,675 litres volume capacity** plus discreet under floor stowage. Loads come in different shapes and sizes so XF Sportbrake keeps its loadspace flexible. With its versatile seat configuration system the rear seats fold fully flat or can be divided with a **60:40 split**, using a thoughtfully placed remote release accessible from the tailgate area. Ease-of-use is a priority: a power tailgate system is available.

AERODYNAMIC ENHANCEMENTS

BLACK PACK

VEHICLE SHOWN ABOVE: XF SPORTBRAKE DIESEL S WITH BLACK PACK IN POLARIS WHITE
VEHICLE SHOWN RIGHT: XF SPORTBRAKE PORTFOLIO IN RHODIUM SILVER

XF Sportbrake's sporting personality can be expressed further with Jaguar's enhancement packs. Adding even more individuality, the **Aerodynamic Enhancements** transform the R-Sport and Diesel S with a unique front bumper treatment, side sills, Gloss Black side window surrounds and a larger tailgate spoiler, as well as a rear valance treatment on the Diesel S. The optional **Black Pack** provides the ultimate in assertive styling with a pure Gloss Black finish for the front grille and surround, the front bumper blades, roof rails and signature blade. Optional Kalimnos alloy wheels complete the distinctive look.

COMBINING TECHNOLOGIES FOR EFFICIENCY

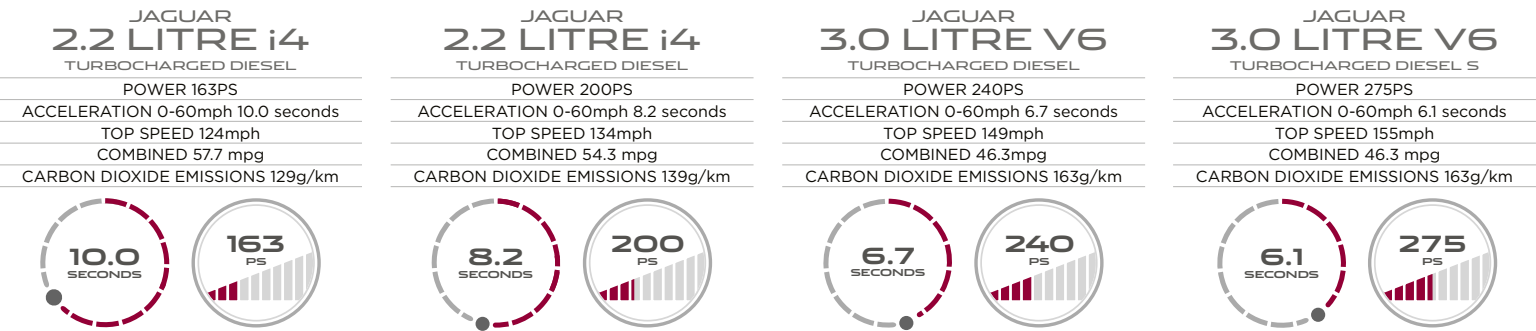

CO₂ EMISSIONS FROM **129G/KM**

UP TO **57.7 MPG**

INTELLIGENT STOP/START

XF is renowned for its performance, refined drive and effortless power and offers a choice of engines to suit the needs of every driver and driving style, whether improved fuel economy or power and performance are the priority. The range includes a selection of the latest diesel units.

Intelligent Stop/Start technology features on all engines delivering improvements in fuel efficiency and CO₂ emissions, whilst Jaguar’s latest engines offer a wide range of power and economy. Choose from the 2.2 163PS Diesel with our lowest ever CO₂ emissions of **129g/km** that help to reduce running costs and vehicle taxation to the breathtaking performance of the 3.0 275PS Turbocharged diesel engine, with its top speed of 155mph.

The fuel figures provided are as a result of official manufacturer’s tests in accordance with EU legislation. A vehicle’s actual fuel consumption may differ from that achieved in such tests and these figures are for comparative purposes only.

DRIVING DYNAMICS

ADAPTIVE DYNAMICS

SELF-LEVELLING REAR AIR SUSPENSION

JAGUARDRIVE CONTROL™

Responsive, powerful, driver-focussed, XF Sportbrake utilises a range of technologies to assist, improve and enhance the driving experience.

Self-levelling rear air suspension ensures that ride height remains constant however heavy the loadspace cargo. It is designed to provide a smooth ride on the roughest roads. Combined with a chassis tuned to provide taut body control, XF Sportbrake delivers the same precise feedback and sports handling as the acclaimed XF saloon.

XF Sportbrake's optional **Adaptive Dynamics*** system continuously monitors the suspension, varying the damping to suit the conditions, whether cornering, navigating potholes or accelerating on the motorway. The system calculates the appropriate suspension settings 500 times per second, adjusting the dampers to help keep the car as flat, stable and secure as possible.

JaguarDrive Control™ interacts with the Dynamic Stability Control (DSC), offering the driver the opportunity to select different modes to suit their driving preference or the prevailing conditions. Sport Mode adjusts throttle and steering response for a more involving drive. Dynamic Mode co-ordinates the vehicle's control systems to deliver an engaging driving experience. Winter Mode is designed to automatically dampen acceleration to achieve more gradual traction on ice, so tyre grip is increased and skid risk reduced.

*Not available on 2.2 163PS. Standard on Diesel S

BODY STYLING

UNIQUE R-SPORT INTERIOR
WITH PIANO BLACK VENEER

R-Sport has all the cutting edge technology, effortless handling and intelligent performance of XF, now combined with even more visual impact. R-Sport is more assertive and radiates self-confidence. Its Jaguar sporting lineage is utterly unmistakable too thanks to unique exterior body styling that includes a Sport front bumper, R style side sills and a rear spoiler, as well as new R-Sport badging on the side power vents. Inside, the sporting theme is immediately recognisable with the R-Sport badge on the steering wheel and bright stainless steel pedals; it continues with the Warm Charcoal interior trim, 6 way Bond grain and Suedecloth seats with Dove contrast stitch and the Piano Black veneer.

INTELLIGENT SAFETY OPTIONS

**ADAPTIVE CRUISE
CONTROL [ACC]**

**EMERGENCY
BRAKE ASSIST [EBA]**

**ADAPTIVE
FRONT LIGHTING**

**BLIND SPOT
MONITOR**

XF Sportbrake's safety systems are anticipatory, utilising an array of technological features to be ready for almost anything and assist the driver in dealing with the unexpected. Standard Dynamic Stability Control (DSC) maximises XF Sportbrake's stability when it detects the wheels slipping.

Adaptive Cruise Control (ACC) uses a radar in the front bumper to monitor the vehicle in front, automatically altering XF Sportbrake's speed to maintain a constant distance.

Emergency Brake Assist (EBA) is designed to work with Adaptive Cruise Control to detect the severity of a stopping situation and applies optimum crisis braking forces as necessary.

Adaptive Front Lighting enhances night-time driving. Sensors react to the car's speed and steering input to deflect the headlamp beams casting light deeper and wider to help give added confidence at night.

Blind Spot Monitor uses radar sensors to remotely cover areas that cannot be seen either directly or in the mirror, and is designed to alert the driver to cars overtaking with an amber warning icon in the external mirrors.

XF Sportbrake's body structure uses 25 different grades of steel. Boron, an element 900 percent stronger than regular mild steel, is used to help create a vertical ring of safety around XF Sportbrake's occupants. A total of 8 airbags helps to add further protection.

VEHICLE SHOWN: XF SPORTBRAKE DIESEL S IN POLARIS WHITE, FITTED WITH ROOF BARS AND BIKE CARRIER ACCESSORIES

CONNECTED: ANYWHERE, EVERYWHERE

A 7 inch colour Touch-screen in the centre console provides multi-function control and displays the three primary functions; audio, climate control and satellite navigation.

SATELLITE NAVIGATION

XF Sportbrake's navigation system gives clear, up-to-date instructions through the Touch-screen. Now with Extended Navigation, it is easier to use than ever and offers more intuitive functionality. Featuring a faster processor and increased memory, route calculation time is reduced and vehicle positioning, due to poor or lost GPS signal, is improved.

CLIMATE CONTROL

Adjust the environment to suit every occupant with dual zone climate control, which includes air particle and odour filtration, humidity control and automatic window de-misting. Your front seats can also be heated or cooled at the touch of a button (if fitted).

> AUDIO CONTROL

Adjust primary controls such as switching stations via the Touch-screen. The listening experience can be further optimised by adjusting tone, balance and fade.

> BLUETOOTH® CONNECTION

Phone calls can be made using controls on your Touch-screen or steering wheel via the in-built telephone system. Link compatible mobile phones to the hands-free telephone system and even stream audio content wirelessly into the entertainment system, all using Bluetooth® audio streaming technology. To make things even easier, the optional Interactive Voice system – Say What You See – helps the driver to use and interact more easily with XF Sportbrake. It displays voice prompts on the Touch-screen for you to vocally control phone calls, navigation or audio.

SOUNDS ALIVE

MERIDIAN

TRIFIELD™

Turn on XF Sportbrake's superb audio system and the cabin comes alive, delivering 250W of pure audio fidelity, surrounding you with exceptional sound quality.

You can personalise your Jaguar even further to enhance your listening experience. Meridian, the ultimate audio specialists, have designed and created two systems specifically for your XF Sportbrake's unique interior space. Both are engineered to take your sound system to the next level. Meridian's 380 watt Sound System with 11 loudspeakers produces a seminal audio experience while the incredible 825 watt Surround System uses no less than 17 loudspeakers (including subwoofer) to create sound that is just as the artist intended. Meridian achieves this by benchmarking acoustic performance against real musical instruments.

Pioneered by Meridian, Trifield™ technology ensures a perfect central image for each occupant and produces an holistic sound within the cabin to deliver a concert-like experience. With an XF Meridian Audio System everyone can hear the difference.

CONSIDERED DESIGN

JAGUARDRIVE SELECTOR™

PHOSPHOR BLUE HALO LIGHTING

Settle in to XF Sportbrake and the softly pulsing 'start' button greets you. Push and the engine engages, XF Sportbrake wakes. Even as you lift your finger, the precision-milled aluminium **JaguarDrive Selector™** rises snugly into the palm of your hand. The engine gently throbs as the air vents, invisible until needed, roll open in unison and cool **Phosphor blue halo lighting** ignites to pick out the interior controls. Let the excitement begin.

Ergonomically optimised, XF Sportbrake's cabin is created to focus on driver and passenger needs. Thoughtful design encompasses every feature. The steering wheel position adjusts at the touch of a button, along with the seat and mirror. These settings can be memorised for different drivers*. XF Sportbrake welcomes you to the drive ahead.

CRAFTED INTERIOR

XF Sportbrake's cabin is a space both contemporary and luxurious, created to excite the senses. Comfort and quality reign supreme with form-hugging seats, classic real wood veneers and contemporary aluminium surfaces. From cabin to loadspace, the same luxuriousness is preserved throughout, from the premium floor carpet and side trims to the polished stainless steel finishers.

Matching XF Sportbrake's own powerful character, a Sport Interior is also available as standard on Sportbrake R-Sport and Diesel S. In addition Diesel S features 18 way adjustable Sports seats, with 3 stage heating and cooling. It includes a Piano Black veneer, bright metal foot pedals, a soft grain leather stitched instrument panel and door rolls with contrast stitching.

BRING YOUR XF SPORTBRAKE TO LIFE

Never before has a Jaguar looked so beautiful, been so powerful and yet had such outstanding versatility. Jaguar has taken design leadership to the next level with XF Sportbrake. Form and functionality are seamlessly brought together in one peerless vehicle. Whether transporting or touring, XF Sportbrake is designed to satisfy both the lifestyle you love and the life you lead.

Visit www.jaguar.co.uk to find out more.

Experience XF Sportbrake for yourself – visit your local Jaguar dealer.

IMPORTANT NOTICE

Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. Whilst every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Distributors and dealers are not agents of Jaguar Land Rover Limited by any express or implied undertaking or representation.

Comparisons are based on manufacturer's own data and testing.

ENVIRONMENTAL INNOVATION AT JAGUAR

Jaguar is proud to continue the company's tradition with its approach to Environmental Innovation. From the choice of lightweight materials and lean production methods to the efficiency of its engines and designs, Jaguar is committed to operating as a more sustainable business and reducing its overall environmental impact.

Jaguar's flagship XJ model was the first in the company to achieve ISO14040, the international standard for vehicle 'life cycle assessment'. This certification measures the environmental impact of XJ from component material sourcing and manufacturing process, through driving 200,000 km. But that's not all. Every new Jaguar is designed to be 85% recyclable and reusable, in addition to 95% recoverable and reusable, with 10% specifically for energy recovery.

The XJ, F-TYPE and XK's innovative use of lightweight aluminium, which incorporates up to 50% recycled material from the manufacturing process of the body structures, provided considerable performance benefits. This includes improved fuel consumption and less CO₂ emissions associated with lighter structures as well as the dynamic performance inherent in its weight saving design.

Jaguar is committed to reducing dependency on fossil fuels, using fewer resources and creating less waste as part of our approach to sustainability excellence.

The company plan includes 25% reduction targets in operating and tailpipe CO₂ emissions, waste to landfill, logistics efficiencies (15%) and water consumption (10%), all based on per vehicle built since 2007. In addition the manufacturing assembly CO₂ emissions of each Jaguar built in the UK since 2009 is 100% offset. For each tonne of CO₂ emitted in the assembly process, Jaguar invests in projects that reduce an equivalent tonne of CO₂ elsewhere.

Taking into account the company's global sales growth and increased investment in more efficient operating facilities, we are proud to have delivered and in some cases exceeded our Environmental Innovation targets as planned for 2012.

And we are on track to meet our 25% reduction in joint European fleet average tailpipe CO₂ emissions by 2015. Looking forward, we have developed our 2020 vision for sustainable business growth that focuses on continued improvements in tailpipe CO₂ emissions, operational carbon neutrality and zero waste.

To date the company has offset over 6 million tonnes of CO₂, provided over 4,000 direct jobs in 60 emissions reductions projects in 17 countries and improved the lives of over 1 million people in our global cook stoves emissions reduction programme.

But it doesn't stop there. Our manufacturing facilities have been certified to ISO14001 since 1998 and we are credited to Platinum Plus level in the UK's Business in the Community Corporate Responsibility Index.
